1. **Classification and Labeling:** Determine the hazard classification of the cosmetic ingredients and products based on GHS criteria. This includes identifying the hazard statements (H) and precautionary statements (P) for each product.

2. **MSDS Development:** Create a Material Safety Data Sheet (MSDS) for each cosmetic product, providing detailed information on its composition, hazards, handling, and disposal.

3. **Packaging and Labeling Requirements:** Ensure that the packaging and labeling of the cosmetics comply with the relevant regulations, such as the Globally Harmonized System (GHS) and the International Air Transport Association (IATA) Dangerous Goods Regulations.

4. **Transportation Mode and Conditions:** Determine the appropriate mode of transport (air, sea, or land) and the required conditions (temperature, humidity, etc.) for the safe transport of the cosmetics.

5. **Documentation and Compliance:** Prepare all necessary documentation, including bills of lading, shipping manifests, and certificates of compliance, to ensure the smooth and legal transport of the cosmetics.

Workers in a warehouse handling and packing cardboard boxes for shipping.

1. **MSDS (Material Safety Data Sheet):** A document that provides information on the hazards of a chemical product and the measures to be taken to protect health and the environment. It is required for all hazardous chemicals.

2. **DOT (Department of Transportation):** The U.S. DOT regulates the safe transport of hazardous materials by air, sea, and land. It has specific rules for the packaging, labeling, and documentation of hazardous goods.

3. **IATA (International Air Transport Association):** IATA's Dangerous Goods Regulations (DGR) govern the transport of hazardous materials by air. These regulations are more stringent than those of DOT and include specific requirements for packaging, labeling, and documentation.

4. **ICAO (International Civil Aviation Organization):** ICAO's Technical Instructions for the Safe Transport of Dangerous Goods by Air provide the international standards for the transport of hazardous materials by air.

5. **IMDG (International Maritime Dangerous Goods Code):** The IMDG Code is the international standard for the safe transport of dangerous goods by sea. It covers the packaging, labeling, and documentation requirements for hazardous materials.

1. **Classification:** Determine the hazard classification of the cosmetic ingredients and products based on GHS criteria. This includes identifying the hazard statements (H) and precautionary statements (P) for each product.

2. **MSDS Development:** Create a Material Safety Data Sheet (MSDS) for each cosmetic product, providing detailed information on its composition, hazards, handling, and disposal.
