1. **Classification and Labeling:** Determine the hazard classification of the cosmetic ingredients and products based on GHS criteria. This includes identifying the hazard classes and associated signal words (e.g., Danger, Warning) and hazard statements.

2. **MSDS/SDS Development:** Prepare a Material Safety Data Sheet (MSDS) or Safety Data Sheet (SDS) for each cosmetic product. This document provides essential information about the product's hazards, handling, storage, and disposal.

3. **Packaging and Labeling Requirements:** Ensure that the packaging and labeling of the cosmetic products comply with the relevant regulations. This includes using the appropriate hazard pictograms, signal words, and hazard statements on the labels.

4. **Transportation Mode and Route:** Determine the appropriate mode of transport (e.g., air, sea, land) and the route to be taken, taking into account the specific requirements for hazardous materials.

5. **Documentation and Reporting:** Maintain accurate records of the transportation process, including the MSDS/SDS, shipping manifests, and any incident reports.

1. **Warehouse Management:** Implement a systematic approach to warehouse management, including inventory control, storage organization, and efficient handling procedures.

1. **MSDS/SDS Development:** Prepare a Material Safety Data Sheet (MSDS) or Safety Data Sheet (SDS) for each cosmetic product. This document provides essential information about the product's hazards, handling, storage, and disposal.

2. **Packaging and Labeling Requirements:** Ensure that the packaging and labeling of the cosmetic products comply with the relevant regulations. This includes using the appropriate hazard pictograms, signal words, and hazard statements on the labels.

3. **Transportation Mode and Route:** Determine the appropriate mode of transport (e.g., air, sea, land) and the route to be taken, taking into account the specific requirements for hazardous materials.

4. **Documentation and Reporting:** Maintain accurate records of the transportation process, including the MSDS/SDS, shipping manifests, and any incident reports.

5. **Incident Response:** Develop and implement an incident response plan to address any potential accidents or spills during the transportation process.

6. **Continuous Improvement:** Regularly review and update the transportation procedures to incorporate new regulations, technologies, and best practices.
