

航空运输的优点

1. 快速

Fast delivery

The flight speed of airplanes is about 600 kilometers to 800 kilometers per hour, which is much faster than other means of transportation. This feature of air freight meets the needs of some time-sensitive cargo.

Low damage rate

After the cargo is loaded on the plane, it is difficult to cause damage to the cargo in the air. Therefore, the damage rate of the cargo is low and the safety is good in the entire cargo transportation link.

Large space span

In a limited time, the space span of the aircraft is the largest.

save related costs

Air freight can save related costs for production companies. Due to the speed of air transportation, it can speed up the circulation of production enterprises' commodities, there by saving product storage fees, insurance premiums and interest expenses, etc.

航空运输的缺点

1. 运费高

2. 货物限制多

3. 易受天气影响

4. 不可达地区多

5. 货物重量限制

6. 货物尺寸限制

Supplier Service: **Very satisfied** (5 stars)

On-time Shipment: **Very satisfied** (5 stars)

Sea shipping agent in Guangzhou China door to door ...

thank you so much for consistent excellent shipping service from Sunny Worldwi de logistics for many years our cargo was really taken care of, and was delivered promptly, thank you also to Josie Lin who arranged our shipment so well.
